

Contents

<i>S. M. Aizikovich, A. S. Vasiliev, S. S. Volkov.</i> Distribution of contact stresses under circular flexible plate lying on a two-layer foundation, with soft interlayer thickness and substrate stiffness taken into account	11
<i>D. Balzani, T. Schmidt, A. J. Schrieffl, G. A. Holzapfel.</i> Constitutive Modeling of Damage Mechanisms in Arterial Walls and Related Experimental Studies.....	17
<i>V. I. Kushch.</i> Micromechanical model of interface damage accumulation in fibrous composite	26
<i>B. E. Melnikov, I. N. Izotov, A. S. Semenov, S. G. Semenov, S. V. Petinov.</i> Experimental foundation and constitutive equations of multisurface theory of plasticity with one active surface.....	35
<i>W. H. Müller, C. Liebold.</i> FE-implementation of higher gradient theories and its use for experimental analysis	44
<i>J. Schröder, S. Brinkhues.</i> A new approach for the incorporation of eigenstresses in arterial wall simulations	53
<i>A. S. Semenov, A. S. Avrunin, A. I. Grishchenko, B. E. Melnikov, A. A. Doktorov.</i> Influence of nanoscale morphological characteristics on the mechanical properties of bone tissue	64
<i>S. G. Semenov, A. S. Semenov, L. B. Getsov, B. E. Melnikov.</i> Application of linear and nonlinear fracture mechanics criteria for crack propagation analysis in single crystal bodies.....	75
<i>A. V. Shatina, E. V. Sherstnev.</i> The evolution of a satellite motion in the gravitational field of a viscoelastic planet with a core.....	83
<i>W. Frącz, T. Pieja, F. Stachowicz, T. Trzepieciński.</i> Formability of the austenitic nickel-base super alloy AMS 5596 sheet in comparison with extra deep drawing quality steel sheet	91
<i>V. G. Kozlov, S. V. Subbotin.</i> Positioning of a sphere in a rotating cylinder under condition of vibrational hydrodynamic top	99

<i>M. Varygina.</i> High-Performance Computations in Numerical Modeling of Wave Propagation in Block Media with Thin Interlayers	107
<i>E. L. Aero, A. N. Bulygin, Yu. V. Pavlov.</i> Propagation of waves in thin crystal layers at different potentials of interaction of sublattices	114
<i>A. Yu. Aleksandrov, K. A. Antipov, A. A. Tikhonov.</i> On the satellite's electrodynamic attitude stabilization	124
<i>R. A. Arutyunyan, K. S. Yakimova.</i> Radiation aging and creep fracture of metallic alloys	129
<i>A. R. Arutyunyan.</i> Fatigue strength criterion based on the energy conservation law ...	135
<i>R. A. Arutyunyan.</i> Fatigue corrosion criterion of complex mechanical systems	139
<i>V. A. Babeshko, O. V. Evdokimova, O. M. Babeshko.</i> Bodies with cracked coatings	144
<i>N. V. Banichuk, S. Yu. Ivanova.</i> On optimal anisotropic bodies in the heat conduction problems	155
<i>A. V. Plashchynska, P. N. Baranova.</i> Fatigue fracture of thin rectangular plates with central crack under uniaxial high-cyclic symmetrical loading	163
<i>I. I. Blekhman.</i> Complex ("chaotic") behavior of dynamical systems as a consequence of its multimode character	172
<i>O. B. Bocharov, V. Ya. Rudyak, A. V. Seryakov.</i> Hierarchical sequence of models and deformation peculiarities of porous media saturated with fluids	184
<i>M. Yu. Filimonov, N. A. Vaganova.</i> Long-term forecasting of changes in permafrost near wells and different technical systems	192
<i>A. N. Fedorova, M. G. Zeitlin.</i> Spin-Orbital Motion: Symmetry, Dynamics, Multiresolution	198
<i>A. N. Fedorova, M. G. Zeitlin.</i> Multiscale representation for space-charge dominated beam transport	208

<i>V. L. Ganimedov, M. I. Muchnaya, A. S. Sadovskii.</i> The comparative analysis of the results of airflow numerical modeling in a human nasal cavity	215
<i>V. L. Ganimedov, M. I. Muchnaya, A. S. Sadovskii.</i> Distinctive features of the air flow in various parts of a human respiratory tract obtained by numerical simulation	220
<i>O. K. Garishin, S. N. Lebedev.</i> Atomic force microscopy as applied to materials with anisotropic nanostructure	226
<i>S. N. Gavrilov, E. V. Shishkina.</i> A strain-softening bar revisited	232
<i>A. S. Grigoriev, E. V. Shilko, V. A. Skripnyak, S. G. Psakhie.</i> Multiscale numerical study of mechanical response of zirconia alumina concrete with particle-based MCA method	248
<i>A. Hakem, Y. Bouafia.</i> Influence of ripening, molding processes and the addition of mg on the evolution of the main mechanical and structural properties of the binary alloy 42000	254
<i>K. S. Ivanov, L. A. Vaisberg.</i> Screen separation: computational model building experience	261
<i>O. A. Ivanova.</i> On Numerical Simulation of Conductor Galloping Using Vortex Element Method	269
<i>D. A. Kitaeva, T. A. Miasnikova, Ya. I. Rudaev.</i> About the nature of the threshold tension	276
<i>V. Kolykhalin.</i> Wave estimation of volume of the liquid, granular and mixed compositions in cylindrical tanks	281
<i>O. O. Kovalev.</i> On Simulation of Hydraulic Fracturing Using Particle Dynamics Method	285
<i>O. N. Kryukova, A. G. Knyazeva.</i> Influence of particle mixing in the melt on the characteristics of electron-beam treatment process of metal surface	292
<i>M. O. Itskovich, A. S. Kuleshov.</i> Motion of a Rigid Body Consisting of Two Symmetric Laminae on a Horizontal Plane	299
<i>S. V. Ifraimov, A. S. Kuleshov.</i> Motion of a Rigid Rod on a Convex Surface	305

<i>G. A. Chernyakov, A. S. Kuleshov.</i> Investigation of the problem of motion of a heavy dynamically symmetric body on a perfectly rough plane by the Kovacic algorithm ...	311
<i>V. A. Kuzkin, A. M. Krivtsov, A. M. Linkov.</i> Proppant transport in hydraulic fractures: computer simulation of effective properties and movement of the suspension	322
<i>D. V. Kuznetsova, I. N. Sibgatullin.</i> The peculiarities of convective motions in the fluid with the quadratic density-temperature dependence.....	338
<i>T. B. Lavrova.</i> The threshold extent of softening and the incipency of fracture in the Tresca-type materials.....	345
<i>A. M. Linkov.</i> Using Modified Formulation for Hydraulic Fractures Driven by Thinning Fluids.....	350
<i>K. A. Lyadova, V. V. Shadrin, L. V. Kovtanyuk, A. S. Ustinova.</i> Shape optimization of a biaxially loaded specimen.....	360
<i>I. K. Marchevsky.</i> On Fast Multipole Algorithms of Velocity Computation in Vortex Element Method for 3D Flows.....	368
<i>N. A. Monahov, P. A. Popov, S. V. Bobashev, V. A. Sakharov, N. P. Mende.</i> Experimental study of pulsed gas discharge dynamics in a solenoidal magnetic field.....	379
<i>V. S. Moreva.</i> On Simulation of the Flow Around an Airfoil Using Different Numerical Schemes of Vortex Element Method	388
<i>I. A. Morozov, L. A. Komar, S. N. Lebedev.</i> The model of elastomeric composite based on the filler cluster network and special interfacial polymer layers.....	398
<i>R. D. Nedin, A. O. Vatulyan.</i> On modeling heterogeneous residual stress.....	404
<i>A. Yu. Nikonov, A. I. Dmitriev.</i> Features of the behavior of the grain boundaries in the thermo-mechanical impact. Molecular dynamics study	413
<i>R. V. Guchinsky, S. V. Petinov.</i> Fatigue design of expansion joint in ship superstructure	420
<i>M. E. Podolsky.</i> Field description of rotational motion	432

<i>M. E. Podolsky</i> . Coriolis inertia forces in the problem of Euler's turbine equation	439
<i>T. N. Pogosian, S. A. Chivilikhin, I. Yu. Popov, V. V. Gusarov</i> . Research of instability development of nanoparticle surface shape	444
<i>D. G. Arseniev, V. V. Kotov, V. A. Polyanskiy, N. A. Smirnova</i> . Biomorphic control of the stochastic vibrations	450
<i>E. E. Mukhin, A. M. Polyanskiy, V. A. Polyanskiy, A. G. Razdobarin, Yu. A. Yakovlev</i> . The destruction of interface of silicon's heterogeneous structures as a result the hydrogen diffusion	457
<i>E. V. Prozorova, A. V. Shadrin</i> . Influence of the nonequilibrium distribution function on dynamics of gas-surface scattering	463
<i>L. Rybarska-Rusinek, D. Jaworski, E. Rejwer, A. Linkov</i> . On modelling hydraulic fractures in inhomogeneous media	474
<i>O. V. Sadovskaya</i> . Numerical simulation of deformation of a metal foam	485
<i>V. M. Sadovskii</i> . On the acoustic approximation of thermomechanical model of a liquid crystal	493
<i>A. Sapotnick, U. Nackenhorst</i> . A Finite Element Approach for a Mechanically Stimulated Biochemical Bone Fracture Healing Model	501
<i>O. K. Garishin, V. V. Shadrin, I. A. Morozov</i> . Experimental studies of polymer-silicate nanocomposites structure	507
<i>S. A. Shanin, A. G. Knyazeva, M. V. Kripakova</i> . Modeling of phases and chemical compounds formation under the treatment conditions of the materials and alloys by particle beams	513
<i>A. A. Shapovalova, R. M. Sultanalieva</i> . Modeling of rocks hardening and softening	521
<i>N. N. Smirnov, V. F. Nikitin, Yu. G. Phylippov, V. R. Dushin</i> . Displacement of miscible viscous fluids from thin gaps	529
<i>N. N. Smirnov, V. F. Nikitin, Yu. G. Phylippov</i> . Hydrogen engines numerical modeling	542

<i>M. N. Smirnova, A. V. Zvyaguin.</i> High velocity gliding of a plate with final length cavity formation	557
<i>V. V. Sokurov, I. K. Sokolovskiy.</i> Investigation of the aggregate state changes of clay soils	564
<i>V. S. Sorokin.</i> Motion of a pendulum with vibrating suspension axis at unconventional values of parameters	569
<i>S. N. Sorokova, A. G. Knyazeva.</i> Mathematical modeling of sintering powders taking into account conversion phasic and volume changes	580
<i>V. D. Sulimov, P. M. Shkapov.</i> Application of Hybrid Algorithms to Computational Model Updating for Hydromechanical Systems	585
<i>P. S. Uglich.</i> On the inverse coefficient problem for the transversally inhomogeneous elastic layer	597
<i>R. L. Salganik, Yu. F. Kovalenko, K. B. Ustinov, A. A. Fedotov.</i> Wave thermorelaxation effects in materials with large amount of gas-filled cracks	605
<i>V. V. Vinnikov, M. I. Gritsevich.</i> Statistical Distributions in Empirical Study of Meteorite Fragments	611
<i>V. Vinnikov, M. Gritsevich, D. Kuznetsova, V. Lukashenko.</i> Drag, ablation and fragmentation of a meteor body in the atmosphere	619
<i>V. Vitkov, L. Ilieva-Mitutsova, A. Platonov, O. Trifonov, V. Yaroshevskiy.</i> Measurement of electrical resistance in selected points of the human skin by low currents	625
<i>A. A. Gubaidullin, A. V. Yakovenko.</i> Nonlinear effects in the vibrating cavity filled with a perfect gas	635
<i>A. K. Belyaev, A. M. Polyanskiy, V. A. Polyanskiy, Yu. A. Yakovlev.</i> The conditions of parametric instability in materials containing the hydrogen	643
<i>Z. Yang, J. Zhang, Z. Sun.</i> Interaction of Circular Cavities and a Crack near Bimaterials Interface under Incident SH-Waves	649

A. V. Sylyvonyuk, N. P. Yaroshevich. About some features of dynamic acceleration of vibration machines with self-synchronisation inertia vibroexciters 662
